TOPIC: RATIONAL NUMBERS

WORKSHEET: 1

Class 8th

1 Answer the following questions:

(i)Is there a rational number which is its own additive inverse? If yes ,write that rational number.

(ii) what is the standard form of $\frac{22}{-55}$?

(iii)Write an equivalent rational number of $\frac{-2}{7}$ with denominator 98.

(iv)Write multiplicative inverse of $\frac{-11}{5}$.

(v)Is the commutative law of division true for rational numbers ?

2. Represent the following rational numbers on number line

(a) $\frac{-7}{2}$ (b) $\frac{35}{7}$

3. Write 5 rational numbers between $\frac{1}{3}$ and $\frac{2}{3}$.

- 4. Taking some values of a & b, show that $|a+b| \leq |a| + |b|$
- 5. Arrange in ascending order $\frac{1}{2}$, $\frac{4}{5}$, $\frac{-2}{3}$, $\frac{-1}{2}$, $\frac{-5}{7}$
- 6. If $a = \frac{3}{4}$, $b = \frac{-1}{2}$ and $c = \frac{1}{2}$ verify :
- (I) a+b=b+a (ii) a+c=c+a (iii)(a+b)+c=a+(b+c)

7. What should be subtracted from the product of $\frac{3}{7}$ & $\frac{2}{5}$ to get $\frac{-4}{35}$?

- 8. Simplify $\frac{11}{3} \times \frac{7}{33} \times \frac{-5}{7} \times \frac{9}{19}$.
- 9. One coin weighs $5\frac{3}{4}$ g .Find the weight of 12 such coins.

10. Which of the following statement are True & which are false:

(i) (a - b) ÷ c $\neq \frac{a}{c} + (\frac{-b}{c})$

(ii) Zero is not a rational number .

(iii) —a ÷ a = -1.

Class : VIII

Read the given passage carefully and answer the questions that follow:

Right now, I am looking at a shelf full of relics, a collection of has-beens, old-timers, antiques, fossils. Right now I am looking at a shelf full of books. Yes, that's right. If you have some spare cash (the going rate is about \$89) and are looking to enhance your reading experience, then I highly suggest you consider purchasing an e-reader. E-readers are replacing the books of old, and I welcome them with open arms (as you should).

If you haven't heard of an e-reader and don't know what it is, then please permit the following explanation. An e-reader is a device that allows you to read e-books. An e-book is a book-length publication in digital form, consisting of text, images, or both, and produced on, published through, and readable on computers or other electronic devices. Sometimes the equivalent of a conventional printed book, e-books can also be born digital. The Oxford Dictionary of English defines the e-book as "an electronic version of a printed book," but e-books can and do exist without any printed equivalent. So now you know what an e-reader is. But you still may be wondering why they put printed books to shame. E-readers are superior to printed books because they save space, are environmentally friendly, and provide helpful reading tips and tools that printed books do not.

E-readers are superior to printed books because they save space. The average e-reader can store thousands of digital books, providing a veritable library at your fingertips. What is more, being the size and weight of a thin hardback, the e-reader itself is relatively petite. It is easy to hold and can fit in a pocketbook or briefcase easily. This makes handling heavy and huge books such as War and Peace, Anna Karenina, and Les Misérables a breeze. Perhaps the only drawback to the space-saving aspect of an e-reader is that it requires you to find new things to put on your shelves.

In addition, e-readers are superior to books because they are environment friendly. The average novel is about 300 pages long. So, if a novel is printed 1000 times, it will use 300,000 pieces of paper. That's a lot of paper! If there are about 80,000 pieces of paper in a tree, this means it takes almost 4 trees to make these 1000 books. Now, we know that the average bestseller sells about 20,000 copies per week. That means that it takes over 300 trees each month to sustain this rate. And for the super bestsellers, these figures increase dramatically. For example, the Harry Potter book series has sold over 450 million copies. That's about 2 million trees! Upon viewing these figures, it is not hard to grasp the severe impact of printed books on the environment. Since e-readers use no trees, they represent a significant amount of preservation in terms of the environment and its resources.

Finally, e-readers are superior to books because they provide helpful reading tips and tools that printed books do not. The typical e-reader allows its user to customize letter size, font, and line

spacing. It also allows highlighting and electronic bookmarking. Furthermore, it grants users the ability to get an overview of a book and then jump to a specific location based on that overview. While these are all nice features, perhaps the most helpful of all is the ability to get dictionary definitions at the touch of a finger. On even the most basic e-reader, users can conjure instant definitions without having to hunt through a physical dictionary. It can thus be seen that e-readers are superior to printed books. They save space, are environment friendly, and provide helpful reading tips and tools that printed books do not. So what good are printed books? Well, they certainly make nice decorations.

Questions:

Q1) Describe an e-book.

Q2) Describe how e-readers are superior in terms of being environment friendly as compared to printed books.

- Q3) What do we conclude from the above passage?
- Q4) Give two reasons of how e-readers save space as compared to printed books.
- Q5) Choose the correct option:

A) According to the author, which of the following reading tips and tools are offered by the e-reader?

I. line spacing customization

- II. the ability to quickly jump to the end of a book
- III. access to an online thesaurus at the touch of a finger
- a. I only
- b. I and II only
- c. II and III only
- d. I, II, and III

B) As used in paragraph 1, it can be inferred that "relics," "has-beens, old-timers, antiques, fossils" are

all words that describe something

- a. ancient
- b. useless
- c. outdated

d. pathetic

C) Based on its use in paragraph 4, it can be inferred that petite belongs to which of the following word families?

a. jubilant, euphoric, playful

b. tall, huge, heavy

c. cute, attractive, charming

d. small, slender, thin
